

- Features I worked on that are included in 3.10.6
 - Tool to automate download of condor tarballs
 - Feature to allow pilot overloading for whole nodes
 - See [slides](#) from previous stakeholder meeting for details
- Features I plan to work for 3.10.7
 - Restore job summary at the end of pilot logfiles
 - Factory reconfigure improvements
 - Improve performances: it takes several minutes on production and test machines
 - Reduce space requirements: often hitting disk space limitations because of condor tarball versioning
