

- **Controlled Overloading** [DONE]

- Introducing option to overload a **subset of nodes** for a specific entry (See [PR536](#)).
- Added new knob `GLIDEIN_OVERLOAD_ENABLED`
 - When set to a percentage overloadin is enabled randomly with the given probability

- **More automation in OSG_Autoconf** [DONE]

- If batch system is Condor (`OSG_BatchSystems = "Condor"`) then set `work_dir="Condor"`
- In whole node case if admin sets `cpus = x`, then set `GLIDEIN_ESTIMATED_CPUS = x`

- **Improved Tarball Validation** [ONGOING]

- Enhanced `get_tarballs` to **warn** when **DEFAULT_TARBALL_VERSION** is missing.
 - Prevents creation of **invalid XML tarball files** due to undeclared defaults.
- Identified **issue with setting 23.0.x as default** — needs to be fixed.

- **Save disk space on factory machines** [NEXT]

- Prevent factory from copying condor tarballs on reconfigs
